Office Action Summary

Art Unit: 3617

### DETAILED ACTION

1. Although the claims of the present application contain common subject matter with parent application 09/152,377, and Double Patenting is believed present, such parent application is unavailable to the examiner, and therefore a determination of Double Patenting cannot be made at this time. In the interest of compact prosecution, Applicant is urged to file a Terminal Disclaimer in response to this action.

2. Claims 22-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 22,24,26 and 28 are improper Markush type claims, in that since the claimed elements of the group fail to "share a common utility" and fail "to share a substantial structural feature disclosed as being essential to that utility".

3. This application contains claims directed to the following patentably distinct species of the claimed invention: claims 22-25 drawn to a boat accessory, and claims 26-29 drawn to a floatation device.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are no generic claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon,

Art Unit: 3617

including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

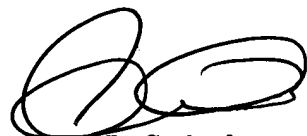

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Papers relating to this application may be submitted to Technology Center 3600 by facsimile transmission. The submission of such papers by facsimile transmission must comply with the notice published in the Official Gazette, **1096 OG 30** (November 15, 1989). The Fax Center number is (703)-305-7687.

5. Any inquiry concerning this communication should be directed to Ed L. Swinehart whose telephone number is (703)-308-2566.
